MEASURING CIRCLES

With the method below, you can check the size based on the ring you have.

1. First print this page at 1:1 scale
2. Place the ring on the sheet of paper and match its inner circumference to the inner circumference of one of the circles in the print.
3. The circle contains its diameter in mm and the corresponding size of the jewel.
4. The number in the corresponding circle will be your size. If you hesitate between similar sizes, choose the larger one.
5. Please note that the above method of measuring size is indicative and may not guarantee complete measurement accuracy.
